The Free Markets ETF – FUND SUMMARY

Investment Objective

The Free Markets ETF (the “Fund”) seeks to provide long-term total returns.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses⁽¹⁾ (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.75%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses ⁽²⁾	0.00%
Acquired Fund Fees and Expenses ⁽²⁾⁽³⁾	0.01%
Total Annual Fund Operating Expenses	0.76%

(1) The Fund’s investment adviser, Tidal Investments LLC (“Tidal” or the “Adviser”), a Tidal Financial Group company, will pay, or require a sub-adviser to pay, all expenses incurred by the Fund (except for advisory fees and sub-advisory fees, as the case may be) excluding interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, as amended (the “1940 Act”), and litigation expenses, and other non-routine or extraordinary expenses (collectively, the “Excluded Expenses”).

(2) Based on estimated amounts for the current fiscal year.

(3) Acquired Fund Fees and Expenses are expenses indirectly incurred by the Fund as a result of its investments in one or more underlying funds, including exchange-traded funds and money market funds.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years
\$78	\$243

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the Example above, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies

The Fund invests in U.S.-listed equity securities of companies that the Fund’s investment sub-advisers, Point Bridge Capital, LLC (“Point Bridge”) SYKON Asset Management LLC (“SYKON”) and Tactical Rotation Management, LLC (“TRM”) (each, a “Sub-Adviser,” and together, the “Sub-Advisers”) expect to benefit from shifts in the regulatory environment that are supportive of free market dynamics. These investments may include companies operating in segments of the economy currently burdened by high levels of regulation, such as the healthcare, financial services, and energy sectors, where the Sub-Advisers anticipate regulatory relief. They may also include companies expected to be less adversely affected by increased regulation, such as those in the technology and consumer goods sectors. The Sub-Advisers consider the following to be examples of shifts in the regulatory environment that would be supportive of free market dynamics: removal of government-imposed rules and regulations on specific industries, reduced taxes or tax incentives, licensing reforms, elimination of tariffs, reduction of quotas, reduction of subsidies.

By investing in companies the Sub-Advisers believe are poised to benefit from regulatory reform and market liberalization, the Fund seeks to unlock value across economic sectors. In addition, the Sub-Advisers believe the Fund's investments may also provide protection against the impact of heightened regulatory burdens by investing in companies expected to demonstrate resilience under such conditions.

In addition to individual equity securities, the Fund may invest in other ETFs (each, an "Underlying ETF") that align with these themes. Further, the Fund may invest in ETFs that provide exposure to commodities potentially benefiting from a freer market environment, such as energy commodities (e.g., oil and natural gas) and agricultural commodities (e.g., corn and soybeans).

The Sub-Advisers employ an active, multi-faceted investment management process designed to identify companies they believe:

- Are well-positioned to benefit from broad deregulation trends;
- Can thrive in a more favorable regulatory environment; and
- Utilize business strategies that capitalize on regulatory shifts.

The Sub-Advisers conduct an ongoing analysis of the regulatory landscape, focusing on pending and proposed deregulatory measures, historical regulatory patterns and their market impacts, sector-specific regulatory developments, and political and economic factors shaping regulatory trends. This analysis forms the foundation of the Sub-Advisers' investment strategy, aimed at identifying sectors and companies with the potential for outperformance amid evolving regulations. The Sub-Advisers utilize a range of data sources for this analysis, commonly drawn from industry reports, direct company interactions, fundamental analysis, earnings transcripts, regulatory databases, and studies from governmental, economic, and industry-specific regulatory organizations.

The Sub-Advisers' investment process incorporates company selection criteria, assessing potential investments based on their capacity to benefit from targeted deregulatory measures, historical performance during past regulatory cycles, proactive and adaptive management approaches, and strong competitive positioning within their respective industries. Emphasis is placed on companies that demonstrate agility in adapting to regulatory changes, innovative strategies that may enable them to capitalize on deregulation opportunities, and the ability to drive product or service innovation enabled by regulatory reform.

Additional Portfolio Attributes:

The Fund's portfolio will generally hold approximately 25 to 50 positions. The Fund is unconstrained as to market capitalization and may invest in companies of any market capitalization. The Fund may actively and frequently trade all or a significant portion of its portfolio holdings, which may result in a high portfolio turnover rate.

The Fund will invest, under normal circumstances, at least 80% of its net assets plus the amount of borrowings for investment purposes, in the equity securities of companies expected to benefit from shifts in the regulatory environment that are supportive of free market dynamics as determined by the Sub-Advisers ("Deregulation Beneficiaries"). For purposes of its 80% test, the Sub-Advisers consider a company to be a Deregulation Beneficiary if it operates in sectors or industries that, in the Sub-Advisers' assessment, are relatively underregulated relative to other sectors or industries or expected to be directly influenced by regulatory changes and that demonstrate characteristics such as adaptability to reduced regulatory constraints, the potential to capitalize on deregulatory measures to enhance profitability, or a proven ability to innovate in response to a less restrictive regulatory framework. Once a company is determined by the Sub-Advisers to be a Deregulation Beneficiary, it will remain a Deregulation Beneficiary until the Sub-Advisers determine that the regulatory environment for the applicable sector or industry has shifted in a way that is not supportive of free market dynamics.

Further, the Fund may invest up to 5% of its net assets, at the time of purchase, in one or more U.S.-listed exchange-traded products ("ETPs") that seek exposure to Bitcoin or Ether (together, "Digital Assets"), each of which is a "cryptocurrency" (each, an "Underlying ETP," and collectively, the "Underlying ETPs"). Such investments may be made to seek to enhance the Fund's diversification, capture growth opportunities in digital asset markets, or respond to macroeconomic conditions that the Sub-Adviser believes favor alternative stores of value. Although each of Bitcoin and Ether may be referred to as a "cryptocurrency," neither is yet widely accepted as a means of payment. An Underlying ETP may hold both. An Underlying ETP may include both (a) an ETP that invests directly in a Digital Asset as its primary underlying asset, and (b) an ETP that invests indirectly in a Digital Asset via derivatives contracts based on the Digital Asset's prices. The Fund currently intends to limit its digital asset exposure to Bitcoin and Ether through such ETPs.

The Fund does not invest directly in Bitcoin, Ether or any other Digital Assets. The Fund does not invest directly in derivatives that track the performance of Bitcoin, Ether, or any other Digital Assets. The Fund does not invest in or seek direct exposure to the current “spot” or cash price of Bitcoin, Ether, or any other Digital Assets. Investors seeking direct exposure to the price of Bitcoin, Ether, or any other Digital Assets should consider an investment other than the Fund. See the Prospectus section entitled “Additional Information About the Fund” for more information about Bitcoin, Ether, and blockchain technologies.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. The discussion below applies to investments made directly by the Fund and to investments made by the Underlying ETFs in which the Fund invests. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Fund - Principal Risks of Investing in the Fund.”

Equity Market Risk. The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, in which the Fund primarily invests, are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers. Securities in the Fund’s portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors. Factors that could impact the market value of an equity security include a company’s business performance, investor perceptions, stock market trends and general economic conditions.

Deregulation Strategy Risks. The Fund’s strategy of investing in companies that may benefit from deregulatory measures entails significant risks, including those stemming from the unpredictable nature of regulatory trends. Deregulation is influenced by political, economic, and social factors, which can shift rapidly and in unforeseen directions. Changes in government priorities, political leadership, or public sentiment may result in the reversal of existing deregulatory policies or the introduction of new regulations that could adversely affect certain industries or companies. Further, while the Fund invests in companies expected to benefit from deregulatory initiatives, not all of these companies may achieve the expected advantages, whether fully, partially, or at all. The actual impact of deregulatory measures may vary widely depending on a company’s specific operational, financial, and competitive circumstances. Companies may also face challenges adapting to new regulatory environments, or their competitive positioning may be undermined by other market factors unrelated to deregulation. These risks could negatively affect the performance of the Fund’s portfolio.

Underlying ETF Risks. The Fund will incur higher expenses when it invests in other funds, including Underlying ETFs and other investment companies. By investing in another underlying fund, the Fund becomes a shareholder of that fund and bears its proportionate share of the fees and expenses of the other underlying fund. There is also the risk that the Fund may suffer losses due to the investment practices of the underlying funds as the Fund will be subject to substantially the same risks as those associated with the direct ownership of securities held by such underlying funds. Investments in Underlying ETFs are also subject to the “ETF Risks” described below.

High Portfolio Turnover Risk. The Fund may actively and frequently trade all or a significant portion of the securities in its portfolio. A high portfolio turnover rate increases transaction costs, which may increase the Fund’s expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

Market Capitalization Risk

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.
- *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.
- *Micro-Capitalization Investing.* Micro-capitalization companies often have limited product lines, narrower markets for their goods and/or services and more limited managerial and financial resources than larger, more established companies, including companies which are considered small- or mid-capitalization. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund’s portfolio.

Underlying Digital Assets ETP Risks. The Fund's investment strategy, involving indirect exposure to Bitcoin, Ether, or any other Digital Assets through one or more Underlying ETPs, is subject to the risks associated with these Digital Assets and their markets. These risks include market volatility, regulatory changes, technological uncertainties, and potential financial losses. As with all investments, there is no assurance of profit, and investors should be cognizant of these specific risks associated with digital asset markets.

- **Underlying Bitcoin and Ether ETP Risks:** Investing in an Underlying ETP that focuses on Bitcoin, Ether, and/or other Digital Assets, either through direct holdings or indirectly via derivatives like futures contracts, carries significant risks. These include high market volatility influenced by technological advancements, regulatory changes, and broader economic factors. For derivatives, liquidity risks and counterparty risks are substantial. Managing futures contracts tied to either asset may affect an Underlying ETP's performance. Each Underlying ETP, and consequently the Fund, depends on blockchain technologies that present unique technological and cybersecurity risks, along with custodial challenges in securely storing digital assets. The evolving regulatory landscape further complicates compliance and valuation efforts. Additionally, risks related to market concentration, network issues, and operational complexities in managing Digital Assets can lead to losses. For Ether specifically, risks associated with its transition to a proof-of-stake consensus mechanism, including network upgrades and validator centralization, may add additional uncertainties.
- **Bitcoin and Ether Investment Risk:** The Fund's indirect investments in Bitcoin and Ether through holdings in one or more Underlying ETPs expose it to the unique risks of these digital assets. Bitcoin's price is highly volatile, driven by fluctuating network adoption, acceptance levels, and usage trends. Ether faces similar volatility, compounded by its reliance on decentralized applications (dApps) and smart contract usage, which are subject to innovation cycles and adoption rates. Neither asset operates as legal tender or within central authority systems, exposing them to potential government restrictions. Regulatory actions in various jurisdictions could negatively impact their market values. Both Bitcoin and Ether are susceptible to fraud, theft, market manipulation, and security breaches at trading platforms. Large holders of these assets ("whales") can influence their prices significantly. Forks in the blockchain networks—such as Ethereum's earlier split into Ether Classic—can affect demand and performance. Both assets' prices can be influenced by speculative trading, unrelated to fundamental utility or adoption.
- **Digital Assets Risk:** Digital Assets like Bitcoin and Ether, designed as mediums of exchange or for utility purposes, are an emerging asset class. Operating independently of any central authority or government backing, they face extreme price volatility and regulatory scrutiny. Trading platforms for Digital Assets remain largely unregulated and prone to fraud and operational failures compared to traditional exchanges. Platform shutdowns, whether due to fraud, technical issues, or security breaches, can significantly impact prices and market stability.
- **Digital Asset Markets Risk:** The Digital Asset market, particularly for Bitcoin and Ether, has experienced considerable volatility, leading to market disruptions and erosion of confidence among participants. Negative publicity surrounding these disruptions could adversely affect the Fund's reputation and share trading prices. Ongoing market turbulence could significantly impact the Fund's value.
- **Blockchain Technology Risk:** Blockchain technology underpins Bitcoin, Ether, and other digital assets, yet it remains a relatively new and largely untested innovation. Competing platforms, changes in adoption rates, and technological advancements in blockchain infrastructure can affect their functionality and relevance. For Ether, the dependence on its proof-of-stake mechanism and smart contract capabilities introduces risks tied to network performance and scalability. Investments in blockchain-dependent companies or vehicles may experience market volatility and lower trading volumes. Furthermore, regulatory changes, cybersecurity incidents, and intellectual property disputes could undermine the adoption and stability of blockchain technologies.

ETF Risks.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as "Authorized Participants" or "APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
- *Trading.* Although Shares are listed on a national securities exchange, such as the NYSE Arca, Inc. (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. Also, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. These adverse effects on liquidity for Shares, in turn, could lead to wider bid/ask spreads and differences between the market price of Shares and the underlying value of those Shares.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Sub-Advisers' success or failure to implement investment strategies for the Fund.

General Market Risk. Securities markets and individual securities will increase or decrease in value. Security prices may fluctuate widely over short or extended periods in response to market, economic or political news and conditions, and securities markets also tend to move in cycles. If there is a general decline in the securities markets, it is possible your investment may lose value regardless of the individual results of the companies in which the Fund invests. The magnitude of up and down price or market fluctuations over time is sometimes referred to as "volatility," and it can be significant. In addition, different asset classes and geographic markets may experience periods of significant correlation with each other. As a result of this correlation, the securities and markets in which the Fund invests may experience volatility due to market, economic, political or social events and conditions that may not readily appear to directly relate to such securities, the securities' issuer or the markets in which they trade.

New Sub-Adviser Risk. Although its principal has significant experience managing ETFs and other investment companies, TRM is a newly registered investment adviser and has not previously served as an adviser or sub-adviser to an investment company. As a result, there is no long-term track record against which an investor may judge TRM and it is possible TRM may not achieve the Fund's intended investment objective.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks' interest rate changes, the possibility of a national or global recession, trade tensions and tariffs, political events, war and geopolitical conflict. These developments, as well as other events, could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, despite government efforts to address market disruptions.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. Although the Fund, Adviser, and Sub-Advisers seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

Performance

Performance information for the Fund is not included because the Fund has not completed a full calendar year of operations as of the date of this Prospectus. When such information is included, this section will provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance history from year to year and showing how the Fund's average annual total returns compare with those of a broad measure of market performance. Although past performance of the Fund is no guarantee of how it will perform in the future, historical performance may give you some indication of the risks of investing in the Fund. Updated performance information will be available on the Fund's website at www.Freemarketsetf.com.

Management

Investment Adviser

Tidal Investments LLC, a Tidal Financial Group company, serves as investment adviser to the Fund.

Investment Sub-Advisers.

The Fund has three investment sub-advisers:

- Point Bridge Capital, LLC
- SYKON Asset Management LLC
- Tactical Rotation Management, LLC

Portfolio Managers

Hal Lambert, Portfolio Manager for Point Bridge, has been a portfolio manager of the Fund since its inception in 2025.

Todd Stankiewicz, CFP®, CMT®, ChFC®, ABFP™, Portfolio Manager for SYKON, has been a portfolio manager of the Fund since its inception in 2025.

Joseph P. Castiglie III, CFA®, Portfolio Manager for SYKON, has been a portfolio manager of the Fund since its inception in 2025.

Michael Gayed, CFA®, Portfolio Manager for TRM, has been a portfolio manager of the Fund since its inception in 2025.

Michael Venuto, Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since its inception in 2025.

CFA® is a registered trademark owned by the CFA Institute.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the “bid” price) and the lowest price a seller is willing to accept for Shares (the “ask” price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the “bid-ask spread.”

When available, information regarding the Fund’s NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund’s website at www.Freemarketsetf.com.

Tax Information

Fund distributions are generally taxable to shareholders as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser, the Sub-Adviser, or their affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund seeks to provide long-term total returns.

An investment objective is fundamental if it cannot be changed without the consent of the holders of a majority of the outstanding Shares. The Fund's investment objective has not been adopted as a fundamental investment policy and therefore may be changed without the consent of the Fund's shareholders upon approval by the Board of Trustees (the "Board") of Tidal Trust I (formerly, Tidal ETF Trust) (the "Trust") and at least 60 days' written notice to shareholders.

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets (including any borrowings for investment purposes) in Deregulation Beneficiaries.

The Fund's 80% policy has been adopted as a non-fundamental investment policy and may be changed without Board approval and at least 60 days' written notice to shareholders.

Manager of Managers Structure

The Fund and the Adviser have received exemptive relief from the SEC permitting the Adviser (subject to certain conditions and the approval of the Board) to change or select new unaffiliated sub-advisers without obtaining shareholder approval. The relief also permits the Adviser to materially amend the terms of agreements with an unaffiliated sub-adviser (including an increase in the fee paid by the Adviser to the unaffiliated sub-adviser (and not paid by the Fund)) or to continue the employment of an unaffiliated sub-adviser after an event that would otherwise cause the automatic termination of services with Board approval, but without shareholder approval. Shareholders will be notified of any unaffiliated sub-adviser changes. The Adviser has the ultimate responsibility, subject to oversight by the Board, to oversee a sub-adviser and recommend their hiring, termination and replacement.

Digital Assets Information

Information About Bitcoin

As noted above, the Fund does not invest directly in Bitcoin or any other Digital Assets. The Fund does not invest directly in derivatives that track the performance of Bitcoin or any other Digital Assets. The Fund does not invest in or seek direct exposure to the current "spot" or cash price of Bitcoin. Investors seeking direct exposure to the price of Bitcoin should consider an investment other than the Fund. However, the Underlying ETPs may invest directly or indirectly (e.g., via futures) in Bitcoin. The following provides an overview of Bitcoin, the Bitcoin Blockchain, the relationship between the two, as well as their use cases.

Bitcoin Description:

Bitcoin, the first and most well-known cryptocurrency, operates on a decentralized network using blockchain technology to facilitate secure and anonymous transactions. Bitcoin represents a digital asset that functions as a medium of exchange utilizing cryptographic protocols to secure transactional processes, control the creation of additional units, and verify the transfer of assets. Its operation on a decentralized blockchain network ensures both transparency and immutability of records, without the need for a central authority. This innovative technology underpinning Bitcoin allows for peer-to-peer transactions and provides a framework for digital scarcity, making Bitcoin a unique investment commodity within the digital currency landscape.

Bitcoin Blockchain Description:

The Bitcoin blockchain constitutes a decentralized, digital ledger technology that chronologically and publicly records all Bitcoin transactions. This technology is characterized by its use of blocks, which are structurally linked in a chain through cryptographic hashes. Each block contains a list of transactions that, once verified and added to the blockchain through a consensus process known as proof of work, becomes irreversible and tamper-evident. The integrity, transparency, and security of the transactional data are maintained autonomously within the Bitcoin network, eliminating the necessity for central oversight and facilitating trust in a peer-to-peer system.

The Relationship between Bitcoin and Bitcoin Blockchain:

Bitcoin is a digital currency that operates on the Bitcoin blockchain, a decentralized and cryptographic ledger system. The Bitcoin blockchain underpins the entire Bitcoin network, providing a secure and transparent mechanism for recording Bitcoin transactions. Each Bitcoin transaction is verified by network participants and permanently recorded on the Bitcoin blockchain, ensuring the integrity and traceability of the digital currency. Thus, while Bitcoin serves as a medium of exchange or store of value, the Bitcoin blockchain acts as the immutable record-keeping system that facilitates and authenticates the circulation and ownership of Bitcoin. This symbiotic relationship ensures that Bitcoin operates in a trustless and decentralized manner, with the Bitcoin blockchain maintaining the currency's history and scarcity.

Bitcoin and Bitcoin Blockchain Use Cases:

Bitcoin and the Bitcoin blockchain serve as innovative financial instruments within the digital economy, offering multiple use cases. However, their adoption has been limited. Key applications include:

1. **Decentralized Transactions:** Bitcoin facilitates peer-to-peer financial transactions globally without the need for intermediaries, reducing transaction costs and times. This feature makes it an attractive option for cross-border transfers and remittances.
2. **Store of Value:** Due to its limited supply and decentralized nature, Bitcoin is perceived as a digital alternative to traditional stores of value like gold, potentially serving as a hedge against inflation and currency devaluation.
3. **Smart Contracts:** While primarily associated with other blockchain platforms, the Bitcoin blockchain can execute smart contracts—self-executing contractual agreements with the terms directly written into code—thereby enabling automated and conditional transactions.
4. **Asset Tokenization:** The Bitcoin blockchain provides a platform for tokenizing assets, converting rights to an asset into a digital token on the blockchain. This can include real estate, stocks, or other forms of assets, enhancing liquidity and market efficiency.
5. **Digital Identity Verification:** Leveraging the security and immutability of the Bitcoin blockchain, companies can develop digital identity verification systems, enhancing privacy and reducing identity theft.

Information About Ether

As noted above, the Fund does not invest directly in Ether or any other Digital Assets. The Fund does not invest directly in derivatives that track the performance of Ether or any other Digital Assets. The Fund does not invest in or seek direct exposure to the current “spot” or cash price of Ether. Investors seeking direct exposure to the price of Ether should consider an investment other than the Fund. However, the Underlying ETPs may invest indirectly (e.g., via futures) in ether. The Underlying ETFs do not invest directly in Ether or any other digital assets.

Ether Description

Ether, is a Digital Asset which serves as the unit of account on an open-source, decentralized, peer-to-peer computer network. Ether may be used to pay for goods and services, stored for future use, or converted to a government-issued currency. As of the date of this Prospectus, the adoption of Ether for these purposes has been limited. The value of Ether is not backed by any government, corporation, or other identified body.

The value of Ether is determined in part by the supply of and demand for, Ether in the markets for exchange that have been organized to facilitate the trading of ether. Ether is the second largest digital asset by market capitalization behind bitcoin.

Ether is maintained on the decentralized, open source, peer-to-peer computer network (“Ethereum Network”). No single entity owns or operates the Ethereum Network. The Ethereum Network is accessed through software and governs the creation and movement of ether. The source code for the Ethereum Network is open-source, and anyone can contribute to its development.

Ethereum Network

The infrastructure of the Ethereum Network is collectively maintained by participants in the Ethereum Network, which include validators, developers, and users. Validators validate transactions and are currently compensated for that service in ether, as determined by the Ethereum Protocol. Developers maintain and contribute updates to the Ethereum Network's source code. Users access the Ethereum Network using open-source software. Anyone can be a user, developer, or validator.

Ether is maintained on a digital transaction ledger commonly known as a "blockchain." A blockchain is a type of shared and continually reconciled database, stored in a decentralized manner on the computers of certain users of the digital asset and is protected by cryptography. The Ethereum blockchain contains a record and history for each Ether transaction.

The Ethereum blockchain allows for the creation of decentralized applications that are supported by a transaction protocol referred to as "smart contracts," which includes the cryptographic operations that verify and secure Ether transactions. A smart contract operates by a pre-defined set of rules (i.e., "if/then statements") that allows it to automatically execute code on the Ethereum Network. Such actions taken by the pre-defined set of rules are not necessarily contractual in nature but are intended to eliminate the need for a third party to carry out code execution on behalf of users, making the system decentralized, allowing decentralized application developers to create a wide range of applications. Requiring payment in Ether on the Ethereum Network incentivizes developers to write quality applications and increases the efficiency of the Ethereum Network because wasteful code costs more. It also ensures that the Ethereum Network remains economically viable by compensating people for their contributed computational resources.

Ethereum Protocol

The Ethereum Protocol is an open source project with no official company or group in control. Anyone can review the underlying code and suggest changes. Because there is no central authority, the release of updates to the Ethereum Protocol source code by developers does not guarantee that the updates will be automatically adopted by the other participants. Users and validators must accept any changes made to the source code by downloading the proposed modification and that modification is effective only with respect to those Ether users and validators who choose to download it. As a practical matter, a modification to the source code becomes part of the Ethereum Network only if it is accepted by validators that collectively represent a supermajority (two-thirds) of the cumulative validations on the Ethereum blockchain.

If a modification is accepted by only a portion of users and validators, a division will occur such that one network will run the pre-modification source code and the other network will run the modified source code. Such a division is known as a "fork."

New Ether is created through "staking" of Ether by validators. Validators are required to stake Ether in order to perform validation activities and then, as a reward, earn newly created ether. Validation activities include verifying transactions, storing data, and adding to the Ethereum blockchain. Further, with its collective computing power on the distributed network, the Ethereum Network provides the ability to execute peer-to-peer transactions to realize, via smart contracts, automatic, conditional transfer of value and information, including money, voting rights, and property.

Principal Risks of Investing in the Fund

The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. The following information is in addition to, and should be read along with, the description of the Fund's principal investment risks in the section titled "Fund Summary—Principal Investment Risks" above. The discussion below applies to investments made directly by the Fund and to investments made by the Underlying ETFs in which the Fund invests. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's NAV per share, trading price, yield, total return and/or ability to meet its investment objective. The following risks could affect the value of your performance in the Fund:

Deregulation Strategy Risks. The Fund's strategy of investing in companies that may benefit from deregulatory measures entails significant risks, including those stemming from the unpredictable nature of regulatory trends. Deregulation is influenced by political, economic, and social factors, which can shift rapidly and in unforeseen directions. Changes in government priorities, political leadership, or public sentiment may result in the reversal of existing deregulatory policies or the introduction of new regulations that could adversely affect certain industries or companies. Further, while the Fund invests in companies expected to benefit from deregulatory initiatives, not all of these companies may achieve the expected advantages, whether fully, partially, or at all. The actual impact of deregulatory measures may vary widely depending on a company's specific operational, financial, and competitive circumstances. Companies may also face challenges adapting to new regulatory environments, or their competitive positioning may be undermined by other market factors unrelated to deregulation. These risks could negatively affect the performance of the Fund's portfolio.

ETF Risks.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as “Authorized Participants” or “APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
- *Trading.* Although Shares are listed on a national securities exchange, such as the Exchange, and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares. Also, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings. These adverse effects on liquidity for Shares, in turn, could lead to wider bid/ask spreads and differences between the market price of Shares and the underlying value of those Shares.

Equity Market Risk. The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, in which the Fund primarily invests, are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers. Securities in the Fund’s portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors. Factors that could impact the market value of an equity security include a company’s business performance, investor perceptions, stock market trends and general economic conditions.

General Market Risk. Securities markets and individual securities may increase or decrease in value. Security prices may fluctuate widely over short or extended periods in response to market, economic or political news and conditions, and securities markets also tend to move in cycles. If there is a general decline in the securities markets, it is possible your investment may lose value regardless of the individual results of the companies in which the Fund invests. The magnitude of up and down price or market fluctuations over time is sometimes referred to as “volatility”, and it can be significant. In addition, different asset classes and geographic markets may experience periods of significant correlation with each other. As a result of this correlation, the securities and markets in which the Fund invests may experience volatility due to market, economic, political or social events and conditions that may not readily appear to directly relate to such securities, the securities’ issuer or the markets in which they trade.

High Portfolio Turnover Risk. The Fund may actively and frequently trade all or a significant portion of the securities in its portfolio. A high portfolio turnover rate increases transaction costs, which may increase the Fund’s expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Sub-Advisers’ success or failure to implement investment strategies for the Fund.

Market Capitalization Risk

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole.
- *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.
- *Micro-Capitalization Investing.* Micro-capitalization companies often have limited product lines, narrower markets for their goods and/or services and more limited managerial and financial resources than larger, more established companies, including companies which are considered small- or mid-capitalization. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund's portfolio.

New Adviser Risk. Although its principal has significant experience managing ETFs and other investment companies, TRM is a newly registered investment adviser and has not previously served as an adviser or sub-adviser to an investment company. As a result, there is no long-term track record against which an investor may judge TRM and it is possible TRM may not achieve the Fund's intended investment objective. In addition, TRM currently has limited personnel and resources, which may prevent it from being able to continue to provide sub-advisory services if one of the principals becomes incapacitated.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. Although the Fund, Adviser, and Sub-Adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks' interest rate changes, the possibility of a national or global recession, trade tensions and tariffs, political events, armed conflict, war, and geopolitical conflict. These developments, as well as other events, could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, despite government efforts to address market disruptions. As a result, the risk environment remains elevated. The Adviser and Sub-Advisers will monitor developments and seek to manage the Fund in a manner consistent with achieving the Fund's investment objective, but there can be no assurance that they will be successful in doing so.

Underlying Digital Assets ETP Risks. The Fund's investment strategy, involving indirect exposure to Bitcoin, Ether, or any other Digital Assets through one or more Underlying ETPs, is subject to the risks associated with these Digital Assets and their markets. These risks include market volatility, regulatory changes, technological uncertainties, and potential financial losses. As with all investments, there is no assurance of profit, and investors should be cognizant of these specific risks associated with digital asset markets.

- **Underlying Bitcoin and Ether ETP Risks:** Investing in an Underlying ETP that focuses on Bitcoin, Ether, and/or other Digital Assets, either through direct holdings or indirectly via derivatives like futures contracts, carries significant risks. These include high market volatility influenced by technological advancements, regulatory changes, and broader economic factors. For derivatives, liquidity risks and counterparty risks are substantial. Managing futures contracts tied to either asset may affect an Underlying ETP's performance. Each Underlying ETP, and consequently the Fund, depends on blockchain technologies that present unique technological and cybersecurity risks, along with custodial challenges in securely storing digital assets. The evolving regulatory landscape further complicates compliance and valuation efforts. Additionally, risks related to market concentration, network issues, and operational complexities in managing Digital Assets can lead to losses. For Ether specifically, risks associated with its transition to a proof-of-stake consensus mechanism, including network upgrades and validator centralization, may add additional uncertainties.

- **Bitcoin and Ether Investment Risk:** The Fund's indirect investments in Bitcoin and Ether through holdings in one or more Underlying ETPs expose it to the unique risks of these digital assets. Bitcoin's price is highly volatile, driven by fluctuating network adoption, acceptance levels, and usage trends. Ether faces similar volatility, compounded by its reliance on decentralized applications (dApps) and smart contract usage, which are subject to innovation cycles and adoption rates. Neither asset operates as legal tender or within central authority systems, exposing them to potential government restrictions. Regulatory actions in various jurisdictions could negatively impact their market values. Both Bitcoin and Ether are susceptible to fraud, theft, market manipulation, and security breaches at trading platforms. Large holders of these assets ("whales") can influence their prices significantly. Forks in the blockchain networks—such as Ether's earlier split into Ether Classic—can affect demand and performance. Both assets' prices can be influenced by speculative trading, unrelated to fundamental utility or adoption.
- **Digital Assets Risk:** Digital Assets like Bitcoin and Ether, designed as mediums of exchange or for utility purposes, are an emerging asset class. Operating independently of any central authority or government backing, they face extreme price volatility and regulatory scrutiny. Trading platforms for Digital Assets remain largely unregulated and prone to fraud and operational failures compared to traditional exchanges. Platform shutdowns, whether due to fraud, technical issues, or security breaches, can significantly impact prices and market stability.
- **Digital Asset Markets Risk:** The Digital Asset market, particularly for Bitcoin and Ether, has experienced considerable volatility, leading to market disruptions and erosion of confidence among participants. Negative publicity surrounding these disruptions could adversely affect the Fund's reputation and share trading prices. Ongoing market turbulence could significantly impact the Fund's value.
- **Blockchain Technology Risk:** Blockchain technology underpins Bitcoin, Ether, and other digital assets, yet it remains a relatively new and largely untested innovation. Competing platforms, changes in adoption rates, and technological advancements in blockchain infrastructure can affect their functionality and relevance. For Ether, the dependence on its proof-of-stake mechanism and smart contract capabilities introduces risks tied to network performance and scalability. Investments in blockchain-dependent companies or vehicles may experience market volatility and lower trading volumes. Furthermore, regulatory changes, cybersecurity incidents, and intellectual property disputes could undermine the adoption and stability of blockchain technologies.

Underlying ETF Risks. The Fund will incur higher expenses when it invests in other funds, including Underlying ETFs and other investment companies. By investing in another underlying fund, the Fund becomes a shareholder of that fund and bears its proportionate share of the fees and expenses of the other underlying fund. There is also the risk that the Fund may suffer losses due to the investment practices of the underlying funds as the Fund will be subject to substantially the same risks as those associated with the direct ownership of securities held by such underlying funds. Investments in Underlying ETFs are also subject to the “ETF Risks” described above.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund's daily portfolio holdings is available on the Fund's website at www.Freemarketsetf.com. A complete description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information (“SAI”).

MANAGEMENT

Investment Adviser

Tidal Investments LLC, a Tidal Financial Group company, located at 234 West Florida Street, Suite 203, Milwaukee, Wisconsin 53204, is an SEC-registered investment adviser and a Delaware limited liability company. Tidal was founded in March 2012 and is dedicated to understanding, researching and managing assets within the expanding ETF universe. As of April 30, 2025, Tidal had assets under management of approximately \$30.51 billion and served as the investment adviser or sub-adviser for 236 registered funds.

Tidal serves as investment adviser to the Fund, and has overall responsibility for the general management and administration of the Fund pursuant to an investment advisory agreement with the Trust, on behalf of the Fund (the “Advisory Agreement”). For the services it provides to the Fund, the Fund pays the Adviser a unitary management fee, which is calculated daily and paid monthly, at an annual rate of 0.75% of the Fund's average daily net assets.

The Adviser provides oversight of the Sub-Advisers and review of the Sub-Advisers' performance. The Adviser is also responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions. The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, and all other related services necessary for the Fund to operate.

Under the Advisory Agreement, in exchange for a single unitary management fee from the Fund, the Adviser has agreed to pay all expenses incurred by the Fund except for Excluded Expenses and the unitary management fee payable to the Adviser.

Sub-Advisers

The Fund's three investment sub-advisers are Point Bridge Capital, LLC SYKON Asset Management LLC and Tactical Rotation Management, LLC (each, a "Sub-Adviser," and collectively, the "Sub-Advisers"). They share joint responsibility for managing the Fund's portfolio. Investment decisions are determined collaboratively through an Investment Committee comprised of the Portfolio Managers from each Sub-Adviser. For their services, the Sub-Advisers are each paid a fee by the Adviser, which is calculated daily and paid monthly.

Point Bridge Capital, LLC

Point Bridge Capital, LLC, is an investment sub-adviser to the Fund. Point Bridge's principal address is 300 Throckmorton Street, Fort Worth, Texas 76102. Point Bridge commenced operations in 2013 and became registered with the SEC in 2013. Point Bridge provides investment advisory services to high net worth individuals, investment companies and other pooled investment vehicles. As of April 30, 2025, Point Bridge had assets under management of approximately \$374.62 million.

With the other sub-advisers, Point Bridge is jointly responsible for the day-to-day management of the Fund's portfolio, including determining the securities purchased and sold by the Fund, subject to the supervision of the Adviser and the Board.

Point Bridge has agreed to assume a portion of the Adviser's obligation to pay all expenses incurred by the Fund, except for Excluded Expenses. For assuming a portion of the payment obligations for the Fund, the Adviser has agreed to pay Point Bridge a portion of the profits, if any, generated by the Fund's unitary management fee. Expenses incurred by the Fund and paid by Point Bridge include fees charged by Tidal ETF Services, LLC, a Tidal Financial Group company, the Fund's administrator and an affiliate of the Adviser. See the section of the SAI titled "Administrator" for additional information about the Fund's administrator.

SYKON Asset Management LLC

SYKON Asset Management LLC, is an investment sub-adviser to the Fund. SYKON's principal address is 500 Mamaroneck Avenue, Suite 435, Harrison, New York 10528. SYKON became registered with the SEC in 2025. As of the date of this Prospectus, SYKON provides investment advisory services only to the Fund.

With the other sub-advisers, SYKON is jointly responsible for the day-to-day management of the Fund's portfolio, including determining the securities purchased and sold by the Fund, subject to the supervision of the Adviser and the Board.

SYKON has agreed to assume a portion of the Adviser's obligation to pay all expenses incurred by the Fund, except for Excluded Expenses. For assuming a portion of the payment obligations for the Fund, the Adviser has agreed to pay SYKON a portion of the profits, if any, generated by the Fund's unitary management fee. Expenses incurred by the Fund and paid by SYKON include fees charged by Tidal ETF Services, LLC, a Tidal Financial Group company, the Fund's administrator and an affiliate of the Adviser. See the section of the SAI titled "Administrator" for additional information about the Fund's administrator.

Tactical Rotation Management, LLC

Tactical Rotation Management, LLC, is an investment sub-adviser to the Fund. TRM's principal address is 118-35 Queens Blvd., Suite 400, Forest Hills, New York 11375. The Sub-Adviser became registered with the SEC in 2024. TRM provides investment advisory and sub-advisory services to other investment companies, including other series of the Trust. As of April 30, 2025, TRM had assets under management of approximately \$59.7 million.

With the other sub-advisers, TRM is jointly responsible for the day-to-day management of the Fund's portfolio, including determining the securities purchased and sold by the Fund, subject to the supervision of the Adviser and the Board.

TRM has agreed to assume a portion of the Adviser's obligation to pay all expenses incurred by the Fund, except for Excluded Expenses. For assuming a portion of the payment obligations for the Fund, the Adviser has agreed to pay TRM a portion of the profits, if any, generated by the Fund's unitary management fee. Expenses incurred by the Fund and paid by TRM include fees charged by Tidal ETF Services, LLC, a Tidal Financial Group company, the Fund's administrator and an affiliate of the Adviser. See the section of the SAI titled "Administrator" for additional information about the Fund's administrator.

Advisory and Sub-Advisory Agreements

A discussion regarding the basis for the Board's approval of the Fund's Advisory Agreement and Sub-Advisory Agreements will be available in the Fund's first annual or semi-annual report to shareholders on Form N-CSR.

Portfolio Managers

The following individuals (each, a "Portfolio Manager") have served as Portfolio Manager of the Fund since its inception in 2025. Messrs. Lambert, Stankiewicz, Castiglie and Gayed are jointly and primarily responsible for the day-to-day management of the Fund, and Mr. Venuto oversees trading and execution for the Fund.

Hal Lambert – Point Bridge

Hal Lambert has a long track record of investment experience, having spent 15 years managing portfolios at Credit Suisse and J.P. Morgan. Mr. Lambert was a Director at Credit Suisse advising and managing client assets in excess of \$1 billion, and he headed discretionary portfolio management for the Southwest and Western regions of the United States for J.P. Morgan. In addition to 15 years with these two global investment firms, Mr. Lambert was a credit analyst for the Texas-based Bass Family in convertible bond arbitrage. He is a Chartered Financial Analyst and was a member of the CFA Institute.

Mr. Lambert has been active in Republican politics for over a decade, using his experience in investing and politics to create the Point Bridge Capital America First ETF (ticker MAGA) in 2017 and the Politically Responsible Investing® strategy. He received a BBA in Finance from The University of Texas at Austin and an MBA from Georgetown University.

Todd Stankiewicz, CFP®, CMT®, ChFC®, ABFP™ – SYKON

Todd Stankiewicz is President and Chief Investment Officer of SYKON Asset Management LLC and a co-founder of SYKON Capital LLC, a registered investment advisory firm delivering values-based planning and institutional-grade investment solutions. He brings over 20 years of experience in investment management and portfolio construction, with a core focus on risk management. His approach integrates real-time quantitative analysis, behavioral finance, and a deep understanding of investor objectives, a combination that drives a disciplined and adaptive investment process. Prior to founding SYKON Capital LLC in 2023, Mr. Stankiewicz spent 10 years at Merrill Lynch. Mr. Stankiewicz holds a B.S. from Boston University and an MBA from Quinnipiac University.

Joseph P. Castiglie III, CFA® – SYKON

Joseph Castiglie is the Chief Operating Officer and Chief Investment Officer of SYKON Asset Management LLC and a co-founder of SYKON Capital LLC, a registered investment advisory firm focused on providing institutional quality investments and comprehensive values-based planning. With 17 years of industry experience, Joe leads investment strategy and operations, focusing on portfolio optimization and risk management using disciplined portfolio management techniques that integrate traditional financial theory and the principles of behavioral finance. Prior to founding SYKON Capital LLC in 2023, Mr. Castiglie spent nine years at Merrill Lynch and six years at JP Morgan. Mr. Castiglie holds a B.S. from the University at Albany, SUNY and holds the Chartered Financial Analyst designation.

Michael A. Gayed, CFA® - TRM

Mr. Gayed is the President and Chief Investment Officer of TRM which he registered as an investment adviser with the SEC in 2024. Prior to that he had been a portfolio manager of the Adviser, which he joined in 2020. Prior to 2020, Mr. Gayed was an LLC Member and employee of the Pension Partners, LLC and served as its Chief Investment Strategist. As Chief Investment Strategist, Mr. Gayed helped to structure portfolios to best take advantage of various strategies designed to maximize the amount of time and capital spent in potentially outperforming investments. Mr. Gayed earned his B.S. in Finance and Management from New York University and holds the Chartered Financial Analyst designation.

Michael Venuto, Chief Investment Officer for the Adviser

Mr. Venuto is a co-founder and has been the Chief Investment Officer of the Adviser since 2012. Mr. Venuto is an ETF industry veteran with over a decade of experience in the design and implementation of ETF-based investment strategies. Previously, he was Head of Investments at Global X Funds where he provided portfolio optimization services to institutional clients. Before that, he was Senior Vice President at Horizon Kinetics where his responsibilities included new business development, investment strategy and client and strategic initiatives. Mr. Venuto studied Philosophy and Religion at NC State University.

CFA® is a registered trademark owned by the CFA Institute.

The Fund's SAI provides additional information about each Portfolio Manager's compensation structure, other accounts that each Portfolio Manager manages, and each Portfolio Manager's ownership of Shares.

Fund Sponsors

The Adviser has entered into a fund sponsorship agreement with each Sub-Adviser pursuant to which each Sub-Adviser is a sponsor to the Fund. Under this arrangement, the Sub-Advisers have agreed to provide financial support (as described below) to the Fund. Every month, unitary management fees for the Fund are calculated and paid to the Adviser, and the Adviser retains a portion of the unitary management fees from the Fund.

In return for their financial support for the Fund, the Adviser has agreed to pay each Sub-Adviser a portion of any remaining profits generated by unitary management fee the Fund. If the amount of the unitary management fees for the Fund exceeds the Fund's operating expenses (including the sub-advisory fee) and the Adviser-retained amount, that excess amount is considered "remaining profit." In that case, the Adviser will pay a portion of the remaining profits to the Sub-Advisers.

During months when the funds generated by the unitary management fee are insufficient to cover the entire sub-advisory fee, those fees are automatically waived, and any such waivers are not subject to recoupment. Further, if the amount of the unitary management fee for the Fund is less than the Fund's operating expenses and the Adviser-retained amount, each Sub-Adviser is obligated to reimburse the Adviser for a portion of the shortfall.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor (defined below), and that has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book-entry or "street name" through your brokerage account.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Share trading prices in line with the NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The NAV for the Fund is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. If such information is not available for a security or other asset held by the Fund or is determined to be unreliable, the security or other asset will be valued at fair value estimates under guidelines established by the Trust and the Adviser (as described below).

Fair Value Pricing

Consistent with Rule 2a-5 under the 1940 Act, the Trust and the Adviser have adopted procedures and methodologies wherein the Adviser, serving as the Fund's Valuation Designee (as defined in Rule 2a-5), determines the fair value of Fund investments whose market prices are not "readily available" or are deemed to be unreliable. For example, such circumstances may arise when: (i) an investment has been delisted or has had its trading halted or suspended; (ii) an investment's primary pricing source is unable or unwilling to provide a price; (iii) an investment's primary trading market is closed during regular market hours; or (iv) an investment's value is materially affected by events occurring after the close of the investment's primary trading market. Generally, when fair valuing an investment, the Valuation Designee will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the investment, general and/or specific market conditions, and the specific facts giving rise to the need to fair value the investment. Fair value determinations are made in good faith and in accordance with the Adviser's fair value methodologies, subject to oversight by the Board. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser or Sub-Adviser will be able to obtain the fair value assigned to the investment upon the sale of such investment.

Investments by Other Registered Investment Companies in the Fund

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions set forth by rule under the 1940 Act, including that such investment companies enter into an agreement with the Fund.

Delivery of Shareholder Documents – Householding

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The Fund intends to pay out dividends and interest income, if any, annually, and distribute any net realized capital gains to its shareholders at least annually. The Fund will declare and pay income and capital gain distributions, if any, in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year for treatment as a regulated investment company (a “RIC”) under the Internal Revenue Code of 1986, as amended (the “Code”). If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (institutional investors only).

The following general discussion of certain U.S. federal income tax consequences is based on provisions of the Code and the regulations issued thereunder as in effect on the date of this Prospectus. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Taxes on Distributions

For federal income tax purposes, distributions of net investment income are generally taxable to shareholders as ordinary income or qualified dividend income. Taxes on distributions of net capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund’s net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends (“Capital Gain Dividends”) will be taxable as long-term capital gains to shareholders. Distributions of short-term capital gain will generally be taxable as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as “qualified dividend income” are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided certain holding period and other requirements are met. “Qualified dividend income” generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. Due to the Fund’s principal investment strategies, described above, the Fund may have only a limited amount of or no qualified dividend income to distribute. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from the Fund.

In addition to the federal income tax, certain individuals, trusts, and estates may be subject to a Net Investment Income (“NII”) tax of 3.8%. The NII tax is imposed on the lesser of: (i) a taxpayer’s investment income, net of deductions properly allocable to such income; or (ii) the amount by which such taxpayer’s modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). The Fund’s distributions are includable in a shareholder’s investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder’s investment income for purposes of this NII tax.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares’ NAV when you purchased your Shares).

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Under the Foreign Account Tax Compliance Act (“FATCA”), the Fund may be required to withhold a generally nonrefundable 30% tax on (i) distributions of investment company taxable income and (ii) distributions of net capital gain and the gross proceeds of a sale or redemption of Fund shares paid to (A) certain “foreign financial institutions” unless such foreign financial institution agrees to verify, monitor, and report to the Internal Revenue Service (“IRS”) the identity of certain of its account-holders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States and the foreign financial institution’s country of residence), and (B) certain “non-financial foreign entities” unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. In December 2018, the IRS and Treasury Department released proposed Treasury Regulations that would eliminate FATCA withholding on Fund distributions of net capital gain and the gross proceeds from a sale or redemption of Fund shares. Although taxpayers are entitled to rely on these proposed Treasury Regulations until final Treasury Regulations are issued, these proposed Treasury Regulations have not been finalized, may not be finalized in their proposed form, and are potentially subject to change. This FATCA withholding tax could also affect the Fund’s return on its investments in foreign securities or affect a shareholder’s return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in the Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that they are not subject to such withholding.

Taxes When Shares are Sold on the Exchange

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of substantially identical Shares.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP’s aggregate basis in the securities delivered plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP’s basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The IRS may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales” (for an AP who does not mark-to-market their holdings) or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year and as a short-term capital gain or loss if such Shares have been held for one year or less.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Important Tax Considerations When Purchasing Fund Shares

If you are investing through a taxable account, you should carefully consider the timing of your investment relative to the Fund’s distribution schedule. Purchasing Fund shares shortly before a distribution may increase your tax liability, a situation commonly referred to as “buying a dividend.”

When the Fund makes a distribution, its share price typically drops by an amount roughly equal to the distribution. As a hypothetical example, if you invest \$5,000 to purchase 250 shares at \$20 per share on December 15, and the Fund pays a \$1 per share distribution on December 16, the share price would adjust to \$19 (ignoring market fluctuations). Although your total investment value remains \$5,000 (250 shares ÷ \$19 in share value plus 250 shares ÷ \$1 distribution), you would owe taxes on the \$250 distribution, even if you reinvest the distribution rather than receiving it in cash.

Distributions are taxable to shareholders even if they are paid from income or gains realized by the Fund before you invested, and even if they were reflected in the purchase price of the shares. Consequently, you may incur taxes on income or gains that accrued before your investment, without corresponding benefit.

Unless you are investing through a tax-advantaged account, such as an IRA or an employer-sponsored retirement plan, you may wish to avoid purchasing Fund shares shortly before a distribution. You can minimize the potential tax impact by reviewing the Fund's distribution schedule prior to investing. When available, information about the Fund's distribution schedule can be found on the Fund's website at www.freemarketsetf.com.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to foreign, state, and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section titled "Federal Income Taxes" in the SAI.

DISTRIBUTION

Foreside Fund Services, LLC, a wholly owned subsidiary of Foreside Financial Group (dba ACA Group) (the "Distributor"), the Fund's distributor, is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor's principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101.

The Board has adopted a Distribution (Rule 12b-1) Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to pay distribution fees for the sale and distribution of its Shares.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

When available, information regarding how often Shares traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund can be found on the Fund's website at www.freemarketsetf.com.

ADDITIONAL NOTICES

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the Sub-Advisers, and the Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

Delaware law permits the governing documents of a statutory trust to expand, restrict or eliminate the fiduciary duties that trustees, shareholders or other persons might otherwise be subject to, and replace them with the standards set forth in the Trust's governing documents.

The Trust's Declaration of Trust provides that the Trustees shall not be subject to fiduciary duties except as set forth in the Declaration of Trust. The foregoing relates specifically to Delaware laws. Nothing in the Declaration of Trust modifying, restricting or eliminating the duties or liabilities of trustees shall apply to, or in any way limit, the duties (including state law fiduciary duties of loyalty and care) or liabilities of such persons with respect to matters arising under the federal securities laws.

FINANCIAL HIGHLIGHTS

This section would ordinarily include Financial Highlights. The Financial Highlights table is intended to help you understand the Fund’s performance for the Fund’s periods of operations. Because the Fund has not yet commenced operations as of the date of this Prospectus, no Financial Highlights are shown.
